Full peer review and PubMed listing.
ALL GOOD SCIENCE published, including:

» Research articles
» Data notes
» Method papers
» Negative/null findings
» Case reports
» Study protocols
» Reviews and systematic reviews

THE FASTEST WAY TO PUBLISH: SUBMIT NOW

Visit F1000Research.com for author guidelines.
F1000Research is an Open Science journal for life scientists. It guarantees:

**No publication delay**
- All articles, including research findings, analyses of scientific developments, opinions, and comments are published immediately, following a quick internal check for obvious inappropriateness.

**All data included**
- Reports of new research findings are always accompanied by the complete dataset on which they are based, provided in a form enabling confirmation or reuse of the data by other researchers.

**Post-publication peer review**
- All articles are refereed thoroughly by invited reviewers, immediately after publication to prevent delay.

**Open refereeing**
- All referee reports are published alongside the article, together with the names and affiliations of the referees. Articles that pass peer review will be listed in PubMed and other significant bibliographic databases.

**Full open access**
- All articles are published without any restriction of access, using CC-BY and CC0 open access licenses to allow text mining.

FAQs:

What does it cost?
Case reports, correspondence and data notes are USD $250; research notes, software tools, clinical practice articles, observation articles and opinion pieces are USD $500; all other articles are USD $1,000. Referees receive a 50% discount on publication charges for any papers submitted within 12 months of refereeing. For more information see: http://f1000research.com/article-processing-charges.

Can I revise my article following open peer review?
Yes. Each new version of your article will receive a separate but related DOI so that users can cite the appropriate version, and referees may update their review following article revision.

Will articles on F1000Research be indexed and citable?
Yes. Once your article has received at least two ‘Approved’ reviews from the referees, or one ‘Approved’ review and two ‘Approved with Reservations’, it will be indexed in PubMed, PubMed Central, Scopus, Embase and many other indexers.

Can I publish elsewhere after I have submitted to F1000Research?
No. F1000Research is not a preprint server; once your article has passed our initial internal review it will be published immediately with a permanent DOI.

F1000Research Advisors:

F1000Research has a prestigious international panel of over 1300 Advisors that includes some of the most eminent names in biology and medicine, including:

» Peter Barnes   » Steven Hyman
» Edward Benz   » John Ioannidis
» Jeffrey Bluestone   » Sir Ravinder Maini
» Gary Borisy   » Philippa Marrack
» Moses Chao   » Elliot Meyerowitz
» Fred Gage   » Randy Schekman
» Carole Goble   » Alan Schechter
» Sir Tim Hunt   » Janet Thornton
