Benefits for Researchers

- Enables authors, not editors, to decide what they wish to publish.
- Articles can be published open access in a professional layout within a few days.
- Invited peer review is author-led and fully open.
- All types of research outputs are encouraged, from research articles to null/negative results, small findings, case reports, data notes and others, providing credit for all of your work.

Why I chose to publish with F1000Research

F1000Research allowed us to make valuable data available to the broader scientific community

F1000Research offers a streamlined submission process that leads to immediate publication of your article and data.

Reviewers provide constructive comments

The open review process pushes authors to submit an accurately prepared manuscript and reviewers to provide constructive comments.

Our manuscript was indexed in PubMed shortly after submission

F1000Research will be among our favourite publishing platforms in future.

Gianmarco Contino
Medical Research Council (MRC) Cancer Unit, University of Cambridge, Cambridge, UK

Gianmarco Contino is a clinical lecturer at the University of Cambridge and Addenbrooke's Hospital. His research focuses on cancer genomic of Barrett's oesophagus and oesophageal adenocarcinoma.

He trained as a surgical oncologist and translational scientist in several institutions including the European Institute of Oncology (Milan), Harvard Medical School and Mass General Hospital (Boston), University of Illinois at Chicago and Imperial College (London).

He published extensively on molecular biology and cancer genomics of Pancreatic and Oesophageal Adenocarcinoma. His research has been supported by American Italian Cancer Foundation, the Associazione Italiana per la Ricerca sul Cancro, Fondazione Umberto Veronesi, the National Institute for Health Research and the Imperial College NHS Foundation.
