Get the most out of your research project through a variety of citable article types.

All the article types below benefit from expert, open peer review and our open data policy.

- **Review**
  - Provides a balanced and comprehensive summary of the latest discoveries in the field which can be cited in subsequent articles.

- **Study Protocol**
  - Allows researchers to present their rationale and proposed methods for their study and get these peer reviewed.

- **Method Article**
  - Can be used to present new methods or modifications of existing methods.
  - Methods support robust, reproducible research, and research training while ensuring those who developed the method are given credit.
  - Can be updated as the method is refined.

- **Data Note**
  - Allows researchers to present their data openly in a highly discoverable, useable, and reproducible way ensuring they get both recognition and credit for their data.
  - Data Notes can then be linked to any subsequent research articles using the data.

- **Software Tool Article**
  - Software tools and code are themselves a research output.
  - Software Tool Articles therefore improve the transparency, visibility and reproducibility of algorithms, code, workflows etc. developed as part a research project, while ensuring the researchers and any associated developers are credited.

- **Brief Reports**
  - Brief Reports allow researchers to share small preliminary studies, describe unexpected or unexplained results or small findings that traditionally would be hidden away in supplementary materials.
  - Can be described using a few illustrations or even a single figure.

- **Brief Report**
  - Publishing a Brief Report during the analysis stage of your project allows you to analyse a sub-set of the data and to validate it.

- **Policy Briefs**
  - Policy Briefs provide a succinct overview and analysis of a policy or policy-related issue. They can be published in addition to a Research Article to discuss implications, actionable recommendations, and policy options.

- **Research Articles**
  - Writing a Research Article at the analysis stage of a research project is now really easy:
    1. Published Reviews, Study Protocols and Methods are citable.
    2. Data, relevant code and software is already available and can be linked and cited.

- **Method Article**
  - A Method Article can be produced alongside a Software Tool Article to provide detailed operational instructions to facilitate reuse.
